Small

things for your big day

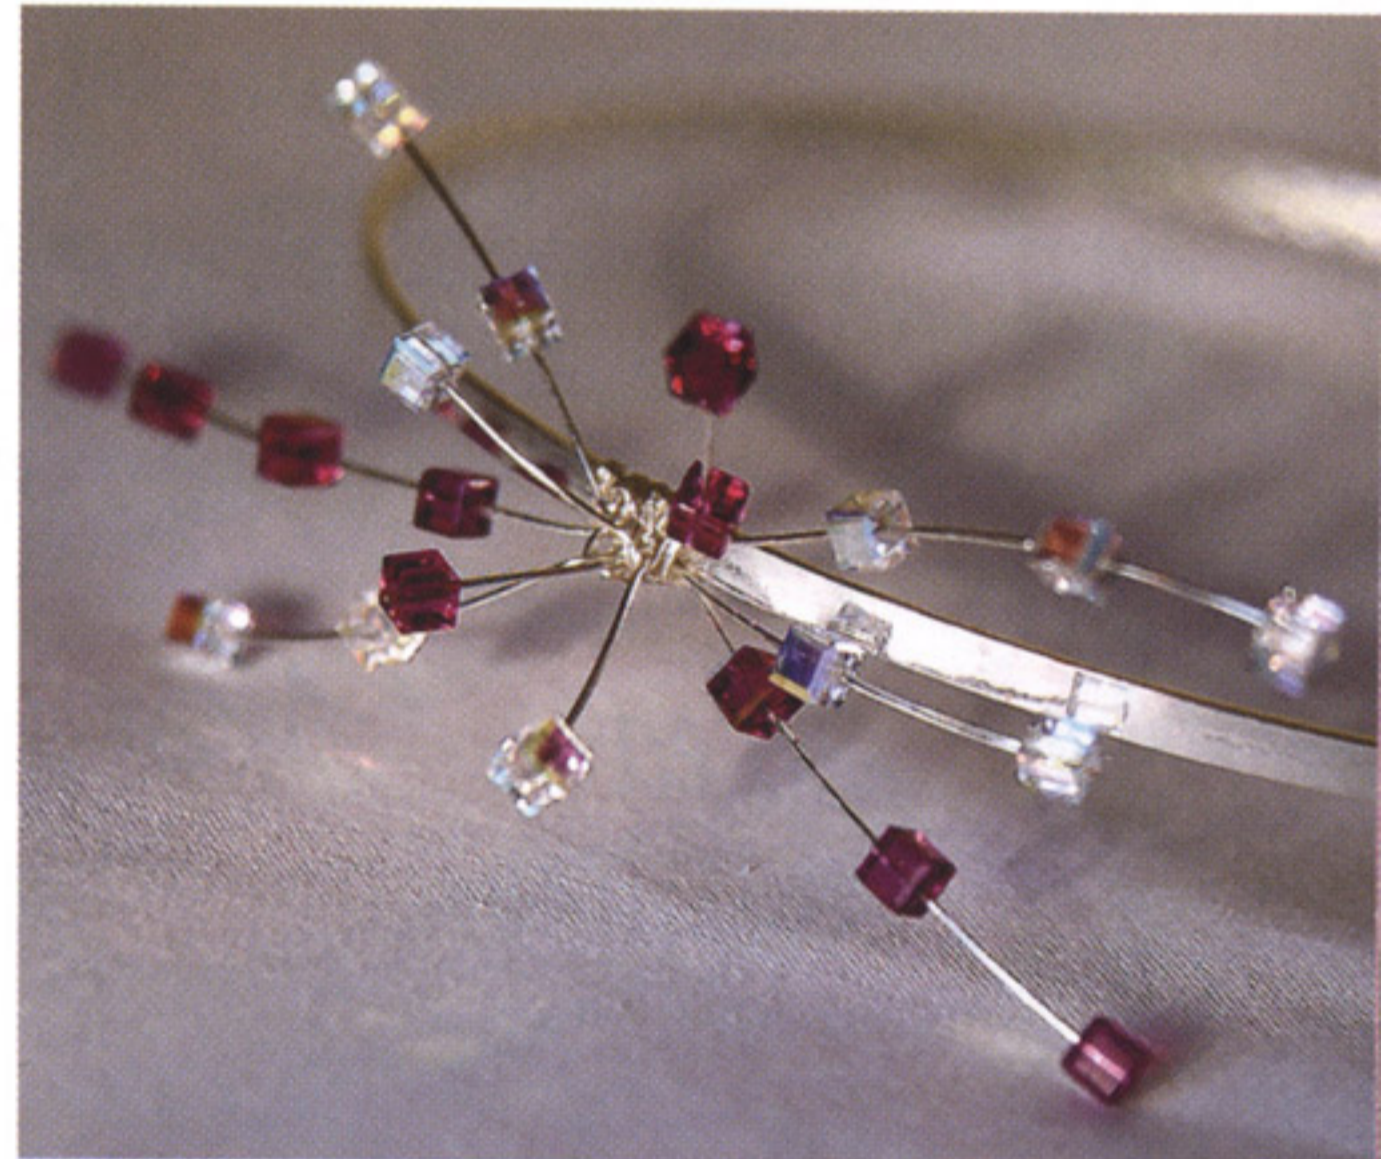

Choosing the right accessories for your wedding outfit can be as crucial as choosing your dress, so it's important you get it right.

There is the tiara or headdress to take into consideration, as well as your jewellery, shoes and sometimes a handbag. But whether you want to keep it simple or go for something more detailed, there are plenty of options out there.

A tiara added to your wedding gown gives an instant 'princess' look to make you feel extra special. There is an almost unlimited variety of styles around too, ranging from fairy-like and delicate to more substantial bejewelled creations.

Many high street stores are now stocking their own wedding ranges, including grooms' outfits and accessories, so you can be first on style as well as cost, leaving more money for your honeymoon.

Finally, when choosing your accessories, remember to think about comfort as well as style.
